HELENA, MONTANA 59601

TELEPHONE NO. 449-3604

February 26, 1973

IN REPLY REFER TO:

TO: ALL LAW ENFORCEMENT AGENCIES

FROM: Bill Erwin, Bureau of Criminal Statistics

SUBJECT: 1972 Arrest Summary

Data for this annual report was derived from information submitted to the Bureau of Criminal Statistics by 56 county sheriff's offices, 41 police departments and six tribal police departments via the monthly arrest register. In 1972, more law enforcement agencies cooperated in submitting arrest data than in 1971 and data submitted was more accurate. Despite a general increase in both felony and misdemeanor arrests, the overall profile of arrests remained fairly constant indicating a standardization of reporting both in 1972 and in the base year 1971.

GENERAL TRENDS

A sharp increase of 10,028 arrests or 36.5 percent was noted in 1972. The total of misdemeanor and felony arrests increased to 37,518 in 1972 compared to 27,490 in 1971. Felony arrests increased 14.8 percent while misdemeanor arrests increased 40.6 percent.

As the increase is spread out over several types of charges and is mostly in the misdemeanor category, improved record keeping and reporting and improved law enforcement are probably more likely explanations for the overall increase than a sharp increase in criminal activity in the state in 1972.

FELONY ARRESTS

In 1972 there were 5,088 felony arrests in the state compared to 4,431 arrests in 1971. Of those arrested 3,932 were adults and 1,150 were juveniles.

BOARD OF CRIME CONTROL

1975 ANNUAL REPORT
JANUARY 1, 1975 TO DECEMBER 31, 1975
REPORT OF THE BOARD OF CRIME CONTROL

ALL LAW ENFORCEMENT AGENCIES

ALL LAW ENFORCEMENT AGENCIES

1975 ANNUAL SUMMARY

Data for 1975 annual report was derived from information submitted to the Bureau of Criminal Statistics by 52 counties, 17 cities, 10 police departments and 10 other law enforcement agencies. The monthly crime statistics for 1975 were low and data submitted was more accurate. Despite a general increase in both felony and misdemeanor arrests, the overall profile of arrests remained fairly constant indicating a steady rate of reporting both in 1975 and in the past year 1974.

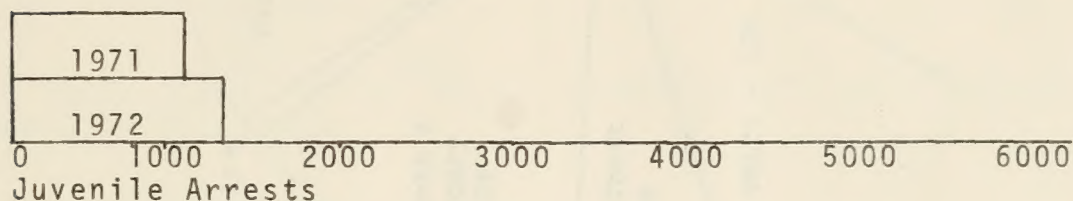

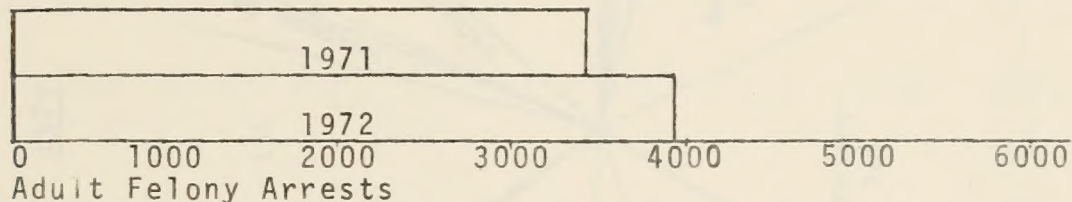

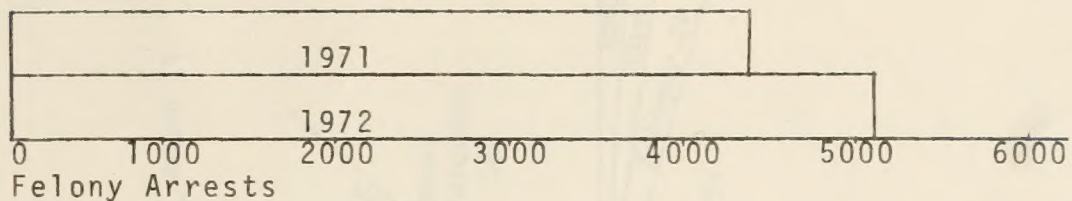

GENERAL TRENDS

A sharp increase of 10.1% in 1975 arrests of 35,200 arrests was noted in 1975. The total of 35,200 arrests and felony arrests increased to 11,100 in 1975 compared to 10,000 in 1974. Felony arrests increased 10.8% while misdemeanor arrests increased 9.8%.

As has happened in previous years, the annual figure of 35,200 arrests is a result of the increased accuracy in reporting and reporting and the increased law enforcement agencies reporting for the annual increase from a 10% increase in 1974.

CRIME TRENDS

In 1975 there were 2,500 arrests which is the same number as in 1974. Of these arrests 1,500 were felonies and 1,000 were misdemeanors.

Adult felony arrests increased 15.8 percent and juvenile felony arrests increased 11.3 percent. With the exception of arrests for federal offenses, arrests increased for all other serious crimes.

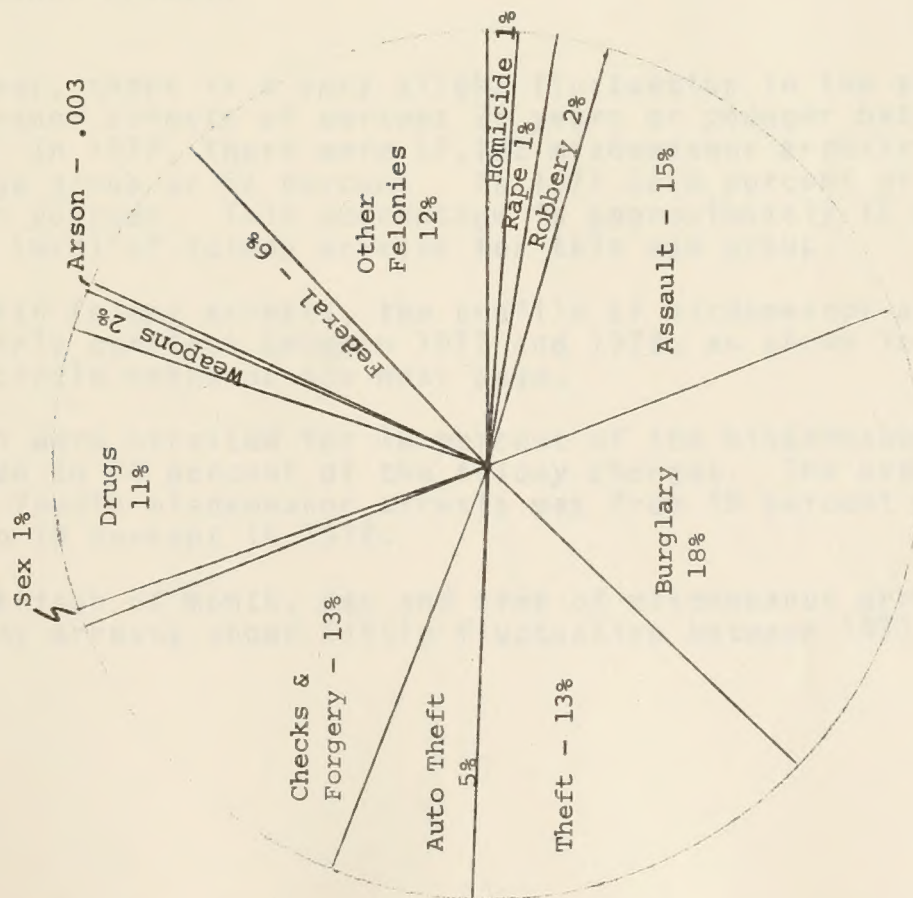

Arrests for drug related charges increased from 473 in 1971 to 688 in 1972. The 45 percent increase could more likely be attributed to improved law enforcement (i.e. the work of undercover drug detention teams) than to a high increase in the incidence of dangerous drug sale and use.

The profile of the felony offender remained fairly constant between 1971 and 1972. Of those arrested on felony charges in 1972, 3,478 were 25 or older for a percentage of 68.4 compared to 66.9 percent in 1971. Males accounted for 90 percent of the felony arrests in 1972 as compared to 89 percent in 1971.

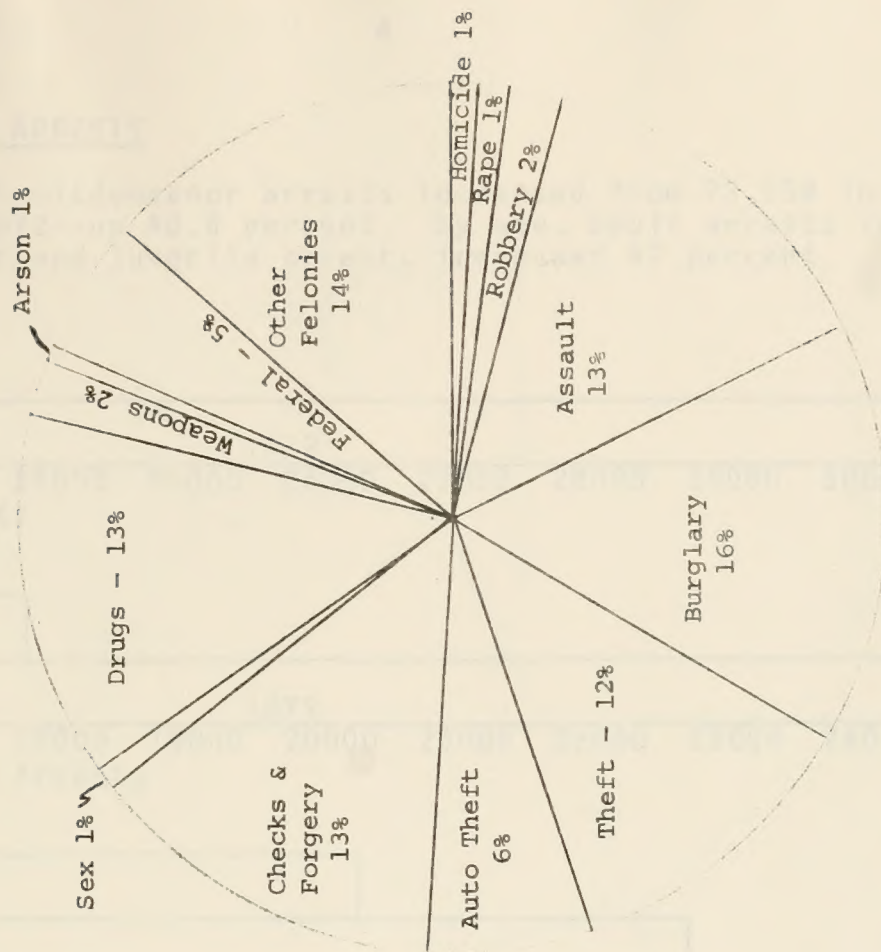

The 1972 profile fluctuated only slightly from the pattern established in 1971 as shown in the felony circle graph on the next page.

THESE ARE THE RESULTS OF THE ANALYSIS

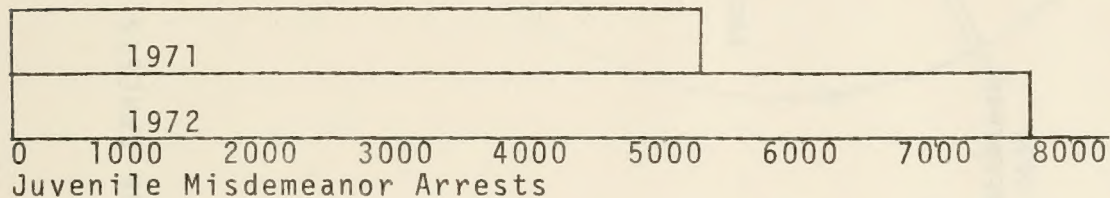

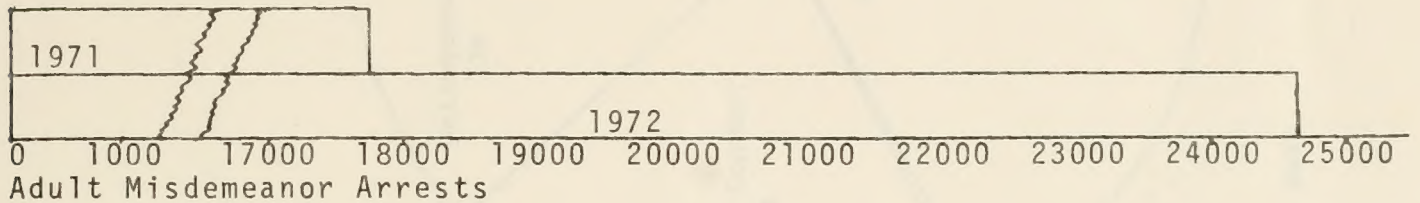

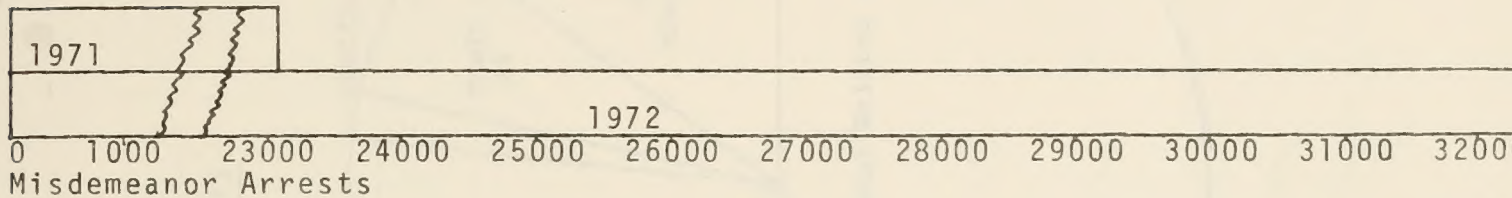

LEF - 120°

RE - 120°

120°

MISDEMEANOR ARRESTS

Overall misdemeanor arrests increased from 23,059 in 1971 to 32,430 in 1972--up 40.6 percent. By age, adult arrests increased 38.7 percent and juvenile arrests increased 47 percent.

However, there is a very slight fluctuation in the percentage of misdemeanor arrests of persons 25 years or younger between 1971 and 1972. In 1972, there were 17,192 misdemeanor arrests of persons in this age group or 53 percent. In 1971 52.8 percent of all arrests were 25 or younger. This percentage is approximately 15 percent below the level of felony arrests for this age group.

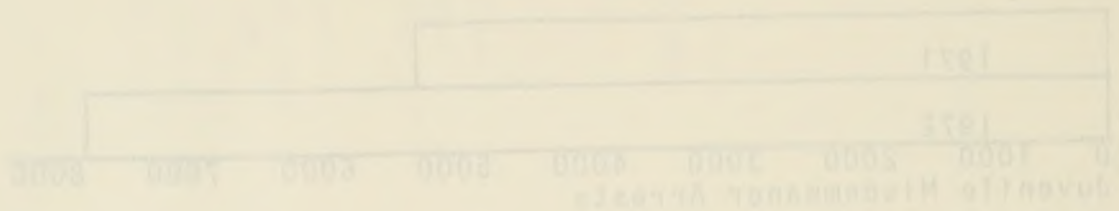

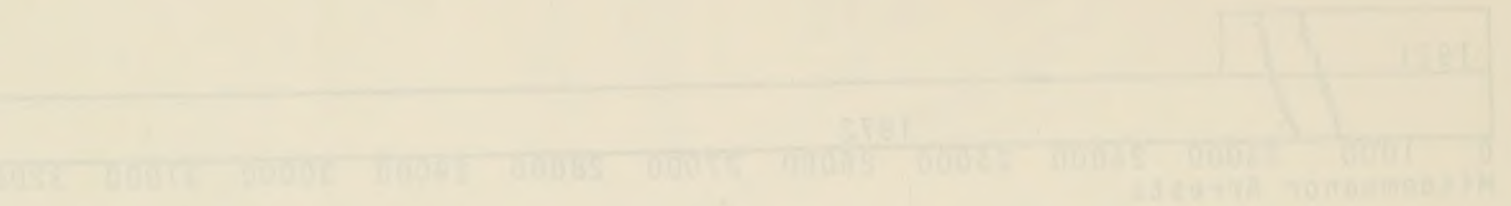

As with felony arrests, the profile of misdemeanor arrest remained fairly constant between 1971 and 1972, as shown in the misdemeanor circle graph on the next page.

Women were arrested for 18 percent of the misdemeanor charges as compared to 10 percent of the felony charges. The overall increase in female misdemeanor arrests was from 15 percent of the total in 1971 to 18 percent in 1972.

Comparison of month, day and time of misdemeanor arrests as with felony arrests shown little fluctuation between 1971 and 1972.

WISCONSIN ADULTS

Overall Wisconsin arrests increased from 23,519 in 1971 to 25,739 in 1975, up 9.4 percent. Female adult arrests increased 25.7 percent and juvenile arrests increased 45 percent.

However, there is a very slight fluctuation in the percentage of Wisconsin arrests of persons 25 years of age or younger between 1971 and 1975. In 1975, there were 17,105 Wisconsin arrests of persons in this age group or 21 percent. In 1971 25.9 percent of all arrests were 25 or younger. This percentage is approximately 12 percent below the level of felony arrests for this age group.

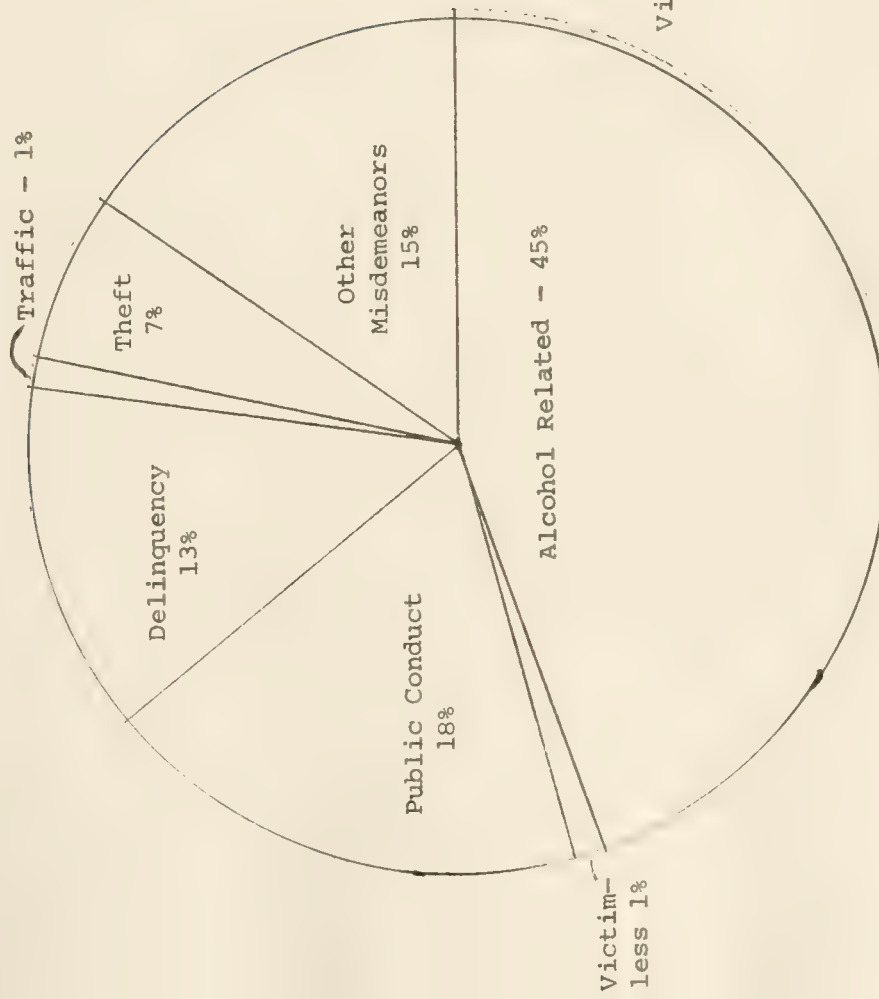

As with felony arrests, the profile of Wisconsin arrests remained fairly constant between 1971 and 1975, as shown in the six demographic circle graph on the next page.

Women were arrested for 10 percent of the Wisconsin arrests as compared to 10 percent of the felony charges. The overall increase in female Wisconsin arrests was from 15 percent in 1971 to 19 percent in 1975.

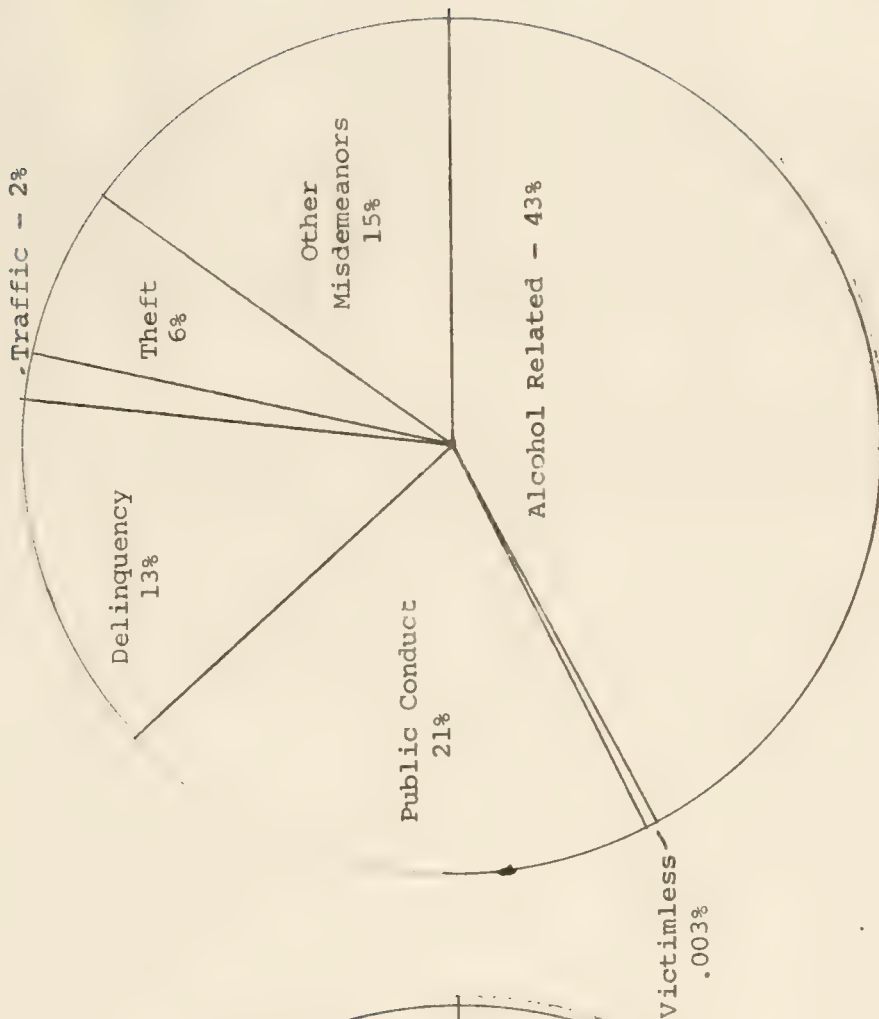

Comparison of male, day and night Wisconsin arrests as six felony circles shows little fluctuation between 1971 and 1975.

MISDEMEANOR ARRESTS

1971

1972

Percentage of total arrests for year

SUMMARY

The increase in reported crime is general for both felony and misdemeanor arrests and is noticeable in most categories. However, the profile of the incidence of arrest, age and sex of offender and date and time of arrest remain constant with little fluctuation. From this data we may conclude that the increase noted in all arrest categories is more the result of increased and accurate reporting than an indicator of a significant change in the amount of criminal activity in the state.

It will be necessary to establish a longer base period of data before attempting to gauge the fluctuations of arrests and relate these statistics to the incidence of crime or the quality of law enforcement.
